

HONDA TYPE R FK8 RADIATOR AND INTERCOOLER

**DIRECT BOLT ON
ZERO MODIFICATIONS
OEM MOUNTING
AUSTRALIAN MADE**

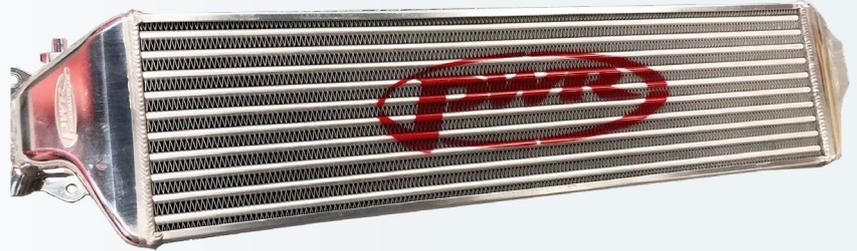

Fully designed, engineered and fabricated in house
CNC machined billet intercooler tanks
Easy fitment with no cutting required
Track proven results

HONDA FK8 TYPE R INTERCOOLER - #PWI81395

At PWR we decided to go with a completely redesigned and upgraded performance intercooler that outperforms the factory unit but still mounts in the OEM location. The core we have engineered utilises our "Racer Series" tube technology and is designed to go above and beyond the OEM intercooler.

- CFD & CAD designed
- Extensive in-house R&D program
- CNC billet machined tanks
- PWR tube and fin core
- OEM mounting
- Not cutting or modifications
- Performance proven product
- Hand fabricated
- Australian made

STANDARD FINISH: BILLET ALUMINIUM. COATED BLACK IS AN OPTIONAL EXTRA

CAN BE PURCHASED INDIVIDUALLY

HONDA FK8 TYPE R RADIATOR 42MM - #PWR81002 (STREET) - #PWR92965 (TRACK)

After extensive testing of the OEM radiator on the dyno, street and track, PWR discovered that the factory engine cooling system struggled to control temperatures under extreme conditions. The coolant temperatures were exceeding the maximum allowable limit and putting the car into limp mode. Installing an off the shelf PWR81002 stopped any limp mode activity with 10 straight laps with zero issues.

- CFD & CAD designed
- Extensive in-house R&D program
- 42mm PWR dimple core technology
- Louvered fin
- Suits OEM mounts
- Suits OEM fans
- No cutting or modifications
- Performance proven product
- Hand fabricated
- Australian made

STANDARD FINISH: STANDARD ALUMINIUM. COATED BLACK IS AN OPTIONAL EXTRA

CAN BE PURCHASED INDIVIDUALLY
